

How to install Shelf label holders

- 1** Remove any old labels and adhesive on the shelf face, Thoroughly remove any remaining adhesive with a citrus based cleaning product. Wipe the shelf face with rubbing alcohol to remove any grease or oil residue.
- 2** The opening edge of the holder is the top.
- 3** Apply the holder from right to left, positioning the bottom of the holder at the bottom of the shelf face. No part of the holder should be below or above the shelf face, however if your holder is larger than your shelf face the overhang should be at the bottom.
- 4** Once positioned, firmly press along the full length of the holder with a cloth to ensure a good bond to the shelf face.
- 5** Insert your labels where needed through the top opening.
